PROFESSIONAL SUMMARY

Computer Engineering student with hands-on experience in **software development, web technologies, cybersecurity, and data-driven applications**. Skilled in building full-stack applications and implementing practical solutions using **Java, Python, JavaScript, React**, and modern development tools.

TECHNICAL SKILLS

Languages: Java, C++, Python, JavaScript

Frameworks & Libraries: ReactJS, Tailwind CSS, Node.js, Scikit-learn, Flask, Shadcn UI

Databases: SQL, MongoDB, Redis

Tools & Platforms: Git, GitHub, Postman, Docker, Firebase, Vite, Vercel, Render, AWS Cloud, Google Cloud, Microsoft Excel, Power BI

Cybersecurity: Network Security, Firewall Concepts, Threat Detection, Access Control

PROFESSIONAL EXPERIENCE

InAmigos Foundation October 2026

AI Web Development Intern 04 Oct – 17 Oct 2026

- Analyzed the **InAmigos Foundation website** and identified potential improvements in navigation, content structure, accessibility, and overall user experience.
- Designed **NGO website feature concepts** covering donations, volunteer registration, campaigns, testimonials, and organizational impact to improve information presentation and visitor engagement.
- Developed **business and personal portfolio webpages** using web technologies, emphasizing structured content, visual hierarchy, and user-friendly interfaces.
- Applied **AI-assisted development tools and UI/UX design principles** to support website creation, feature planning, and user-focused interface improvements.

Claidroid Technologies Summer Internship

CyberSecurity Intern

- Developed a **Python-based firewall project** to monitor and control network traffic based on predefined security rules.
- Gained hands-on exposure to **cybersecurity fundamentals**, including network security, firewall concepts, threat detection, and access control.
- Applied **Python programming and networking concepts** to implement and test security mechanisms for protecting systems from unauthorized network activity.

SELECTED PROJECTS

GEOIMPACT GitHub

Technologies: Next.js 15, TypeScript, Tailwind CSS v4, shadcn/ui

- Developed an AI-powered geopolitical news analysis platform using **Next.js 15** and TypeScript to analyze geopolitical events and their potential impact on India.
- Built the user interface using **Tailwind CSS v4** and shadcn/ui components for a modern and responsive experience.

VIRTUAL BANKING SYSTEM GitHub

Technologies: Java, MySQL, JDBC

- Developed a Java-based simulated banking platform supporting registration, authentication, fund transfers, and account tracking.
- Integrated **MySQL** for persistent data storage and administrative management of banking operations.

SWISH GitHub

Private Social Sharing Platform for Campus Communities

- Developed a full-stack social media platform designed specifically for academic communities, enabling verified students and faculty to share photos, updates, and achievements.
- Focused on **privacy, community engagement, moderation**, and a modern user experience for campus networking.

EDUCATION

K. J. Somaiya Institute of Technology Mumbai, Maharashtra

Bachelor of Technology (B.Tech.) in Computer Engineering 2023 – 2027

Academic Record: CGPA: 7.10 / 10.0 | SSC: 95.20% | HSC: 72.33%

CERTIFICATIONS

- **Java Programming**
- **MERN Full Stack Web Development**
- **Python for Data Science, AI & Development** – IBM
- **AWS Cloud Foundations Training Badge**
- **Ubuntu Linux Training** – Cursa
- **English Language for Competitive Exams** – NPTEL
